- 7. Capture interval

Initial Operation

INSTALL microSD CARD & BATTERIES

- 1. Insert microSD card. *1
- 2. Open battery door. Then install 2 AA batteries.
- *1 Support up to 128GB microSD card. For 64 or 128 GB microSD card, follow instruction on the LCD screen to format the card before using it the first time.

- 1. Power on: hold "Power Button" for 5 secs.
- 2. Power off: hold "Power Button" for 3 secs.

POWER SAVING MODE

When the camera is turned on, and there is no recording job:

Sleep Mode

The camera goes to sleep mode to save power after 20 seconds without activity. The LED indicator turns solid green^{*1}.

Press "●" button to wake up the camera.

Power off

The camera shuts down after 30 seconds without activity.

SET DATE & TIME

The date & time menu appears when the camera is first turned on.

- 1. Set the numeric value using "◀ / ▶".
- 2. Press "•" button to confirm and go to next option.

Prepare For Shooting

CHANGE CAPTURE MODE

- 1-1. At preview screen, press "◀" button to go to CAPTURE MODE setting.
- 1-2. Select desired **CAPTURE MODE** and press "•" button to confirm and return to preview screen.

Capture mode	Description
Time Lapse	Camera captures series of photos at a time interval of your choice, and auto combines them into a ready-to-view time lapse video.
Step Video	Camera records a short video clip at a selected capture interval, and auto combines those clips to a ready-to-view step video.
Stop Motion	Manually press the shutter to take multiple photos one frame each time. The camera then auto combines those photos into a stop motion video.
Still Photo	Capture single still photo.

CHANGE CAPTURE INTERVAL

- 2-1. At preview screen, press "▶" button to go to CAPTURE INTERVAL setting.
- 2-2. Select your desired interval and press " " button to confirm and return to preview screen.

Capture mode	Interval options
Time Lapse	Select the desired capture rate
Step Video	Burst Length Burst Interval
Stop Motion	×
Still Photo	×

TIME LAPSE / STEP VIDEO RECORDING
